Selected areas	Specific topics
Implications of the facilitated nature of SEL	• in-session vs. out-of-session learning and the specific opportunities and challenges of each • ways to facilitate connections between in-/out-of-session learning
Technology challenges	• sensing of the interpersonal aspects – 'in the wild', robust technology • supporting the complexity of curricula – adaptability, modularity • dealing with privacy, ethics, up-keep costs and servicing of technology etc.
Design challenges	• ways to support cooperation with curricula designers • designing to `*teach and disappear*' • challenges shared with other ubicomp systems
Methodological challenges	• accommodating the complex structure and long-term methods of curricula design • matching evaluation approaches with those used in HCI research • finding a good balance of roles for HCI involvement
